Lambda > Add triggers

Trigger configuration

Info

Kinesis

aws analytics event-source-mapping polling streaming

Kinesis stream

Select a Kinesis stream to listen for updates on. To select a stream in another shared AWS account, enter its Amazon Resource Name (ARN).

Q kinesis/AnomalyDetectionStream

X

Consumer - optional

Select an optional consumer of your stream to listen for updates on. To select a consumer in another shared AWS account, enter its ARN.

Q Select a consumer in your AWS account or enter a shared ARN

Event poller configuration

☒ Activate trigger

Select to activate the trigger now. Keep unchecked to create the trigger in a deactivated state for testing (recommended).

☐ Enable metrics

Monitor your event source with metrics. You can view those metrics in CloudWatch console. Enabling this feature incurs additional costs. [Learn more](#)

Batch size

Info

The maximum number of records in each batch to send to the function.

100

Starting position

Info

The position in the stream to start reading from.

Trim horizon

Batch window - optional

The maximum amount of time to gather records before invoking the function, in seconds.

► Additional settings

In order to read from the Kinesis trigger, your execution role must have proper permissions.
